Football on St. Vincent and the Grenadines

Despite the dearth of facilities on the St. Vincent and Grenadines archipelago, football is still the most popular sport on the islands. One major consideration is the appointment of a foreign technical director or coach who would devote time and energy to youth level. One player has made his name internationally - national team captain Esra Hendrickson, who plays for DC United in the USA.

Goal project

On 22 October 2008 the *Goal* Bureau approved an amendment to a plan submitted in autumn 2005 to build a technical centre. The St Vincent and the Grenadines FA now has its sights set on its own headquarters, mainly to bring an end to the current situation of having to rent its office space. The funds that would be freed up would then be spent on promoting football.

Women's football

When, in 1995, today's FIFA President said "The future of football is feminine", it was more than mere lip service. It reflected a strong belief in the huge potential that women's football has to develop. Ever since, FIFA has given targeted support for the efforts of associations who offer women the same opportunities to develop as male players. Launched in 1998, FIFA's Financial Assistance Programme (FAP) introduced a requirement in 2004 for the associations and confederations to invest at least 4% of their FAP funding into women's football. This threshold was increased to 10% in 2005. On top of this commitment, FIFA also promotes the women's game in more general ways by directly financing women's matches and organising competitions and symposiums. Thanks to its development programmes, FIFA is also playing an active role in the training of administrators, coaches, referees and sports doctors.
